Erik M. Ferragut

Applied Research Mathematician
Cyber Security Research Scientist
Oak Ridge National Laboratory
http://erikferragut.me
ferragutem@ornl.gov

Research Interests

My research focus is in improving the security and dependability of network, computer, and cyber-physical systems through the development and application of data analytics and machine learning. My main areas of recent research are (1) anomaly detection for network intrusion defense and (2) resilience and integrity analysis for cyber-physical defense. I am also interested in other areas of security, such as analyzing network sensor data and measuring the advantage information provides in an adversarial setting.

Classified Papers

Authored 16 peer-reviewed classified papers in cryptology and related fields (1994–2005, 2007–2009). Received several Crypto-Mathematics Institute and KRYPTOS competitive paper awards.

Education

December 2003	Ph.D. in Mathematics University of Michigan, Ann Arbor Dissertation: "*Detection of Epistatic Effects in Genetic Data*" Advisor: Phil Hanlon
August 1999	M.S. in Mathematics University of Michigan, Ann Arbor
May 1997	B.S. in Mathematics, *Summa Cum Laude* Highest honors in Mathematics, Physics, and Philosophy Ursinus College, Collegeville, PA

Research Experience

6/2009 – Present

Cyber Security Research Scientist
Oak Ridge National Laboratory
Oak Ridge, Tennessee

Research scientist and principal investigator for cyber security, anomaly and intrusion detection, situation awareness, probabilistic modeling, and machine learning. Key contributor to research in visual analytics, adversarial control theory, critical infrastructure protection, quantum computing, compressive sensing, and formal methods. Leading research/operations integration for the deployment of research-developed tools in ORNL's cyber infrastructure.

8/2007 – 6/2009

Applied Research Mathematician
Institute for Defense Analyses
Princeton, New Jersey

Applied multiple areas of mathematics (group theory, representation theory, coding theory, combinatorial commutative algebra, probability theory, combinatorics, and topology) to research problems for national security.

8/2006 – 8/2007

Cyber Security Research Scientist
Oak Ridge National Laboratory
Oak Ridge, Tennessee

Research staff contributing to distributed anomaly detection algorithms for cyber security. Supported projects in weigh-in-motion and communications.

10/2005 – 8/2006

Applied Research Mathematician
Johns Hopkins University, Applied Physics Laboratory
Laurel, Maryland

Improved methods for systematizing and validating large-scale risk assessments. Co-discovered and reported a cyber vulnerability on a high-value system together with an effective exploit.

8/1993 – 10/2005 *Applied Research Mathematician*
National Security Agency
Fort George G. Meade, Maryland

Participant of Stokes Fellowship Co-operative program (1993–1997), Director's Summer Program (1995), and Applied Mathematics Program (1997–2002). Research staff member in Cryptographic Research. Applied multiple areas of mathematics (group theory, representation theory, combinatorial commutative algebra, probability theory, combinatorics, and topology) to research problems for national security.

9/1997 – 12/1999 *Graduate Research Assistant*
University of Michigan
Ann Arbor, Michigan

Instructor for two sessions of pre-calculus.

Mentoring

- John P. Collins, Post-Masters Researcher, 2013–2014.
- Robert Bridges, Post-Doctoral Researcher, 2012–2013.
- Riley Spahn, Post-Baccalaureate Researcher, Fall 2012 to Spring 2013, and Auburn University Undergraduate Student, Summer 2011
- Jason Laska, Intelligence Community Post-Doctoral Researcher, 2011–2012.
- E. Nicole Braden, University of the Cumberlands Undergraduate Student, Summer 2011.
- Scott Mancuso, Brigham Young University Undergraduate Student, Summer 2011.
- Stephen Kelley, Intelligence Community Post-Doctoral Researcher, Summer 2010 to Spring 2012.
- Alicia Marino, Quinnipiac University Undergraduate Student, Spring 2011.
- David Darmon, Ursinus College Undergraduate Student, Summer 2010.
- Anita Zakrzewska, Brandeis University Undergraduate Student, Summer 2010.
- Aimee Cothran, High School Mathematics Teacher in the Greater Memphis Area, Summer 2010.

Teaching Experience

Spring 2011 – Fall 2012 *Online Adjunct Instructor (4 Classes Taught)*
University of Maryland University College
Adelphi, Maryland

Instructor (online) for core courses leading to a Master's Degree in Cybersecurity. CSEC 610 Cyberspace and Cybersecurity (2 sessions). CSEC 630 Prevention and Protection Strategies in Cybersecurity (2 sessions).

Spring 1998 – Fall 1999 *Graduate Teaching Assistant*
University of Michigan
Ann Arbor, Michigan

Instructor for precalculus mathematics course (2 sessions).

PI Experience and Funds Awarded

- Oak Ridge National Laboratory, PI for Laboratory Directed Research and Development **$790K** research project "Situation Awareness in Complex Networks". October 2013 to September 2015.
- Center for Medicare and Medicaid Services (CMS), Affordable Care Act data solutions task. On the basis of success of a schema matching tool, PI for **$1M** automated data quality assessment task. October 2013 to September 2014.
- Intelligence Community Post-Doctoral Research Program, PI (Mentor) for **$240K** research project "Deception Detection". October 2011 to September 2010.
- Johnson C. Smith University (HBCU), PI for a **$60K** Cyber Security Curriculum Development and Training. October 2010 to September 2011.

Awards and Fellowships

- Supplemental Employee Performance Merit Award, Oak Ridge National Laboratory, October 2013.
- Crypto-Mathematics Institute (NSA's oldest learned society), Theoretical Category Honorable Mention, Paper Award, 2009
- KRYPTOS (NSA cryptanalysis society), Best Paper Award, 2003
- Crypto-Mathematics Institute, Theoretical Category Best Paper Award, 2003
- Crypto-Mathematics Institute, Theoretical Category Honorable Mention Paper Award, 2003
- The University of Michigan, Rackham Merit Fellowship, Rackham School of Graduate Studies, 1997
- National Science Foundation Minority Graduate Fellowship, Mathematics, 1997

Professional Membership and Service

Memberships

- Member, American Mathematical Society (AMS)
- Member, Society for Industrial and Applied Mathematics (SIAM)
- Member, Latinos in Science and Engineering (MAES)

Service

- Reviewer in 2015 for SSCI CICS 2015, IEEE Transactions on Automatic Control, July 2015, and Hawaii International Conference on System Sciences (HICSS) 49, to be held Jan 2016.
- Organizer in 2013, Machine Learning Challenges in Cyber Security Applications, Special Session for the International Conference on Machine Learning Applications (ICMLA) 2013.
- Reviewer in 2012, IEEE Networks Magazine.
- Reviewer in 2010, ACM Transactions on Modeling and Computer Simulation Journal (ACM TOMACS) 2010 and Hawaii International Conference on System Sciences (HICSS) 2010.
- Reviewer, Cyber Security and Information Intelligence Research Workshop (CSIIRW) 2010–2014.

Skills and Clearances

- Fluent in English and Spanish
- Programming preferences: Python, C/C++, Matlab/Octave, Sage
- Citizenship: USA
- Clearances: Q and TS//SI
