

# Erik M. Ferragut

Director of Data Scientist  
Optum (UnitedHealth Group)  
<http://erikferragut.me>  
erikferragut@gmail.com

## Research Interests

My research focus is in the development and application of anomaly detection to various domains, including detection of fraud, waste, and abuse in health care, detection of attacks in cyber security, and detection of attacks and operating failures within cyber-physical systems. I am also interested in research in quantum computation and educational methods.

## Publications

### Refereed Journal Papers

- [1] Ryan S Bennink, **Ferragut, Erik M**, Travis S Humble, Jason A Laska, James J Nutaro, Mark G Pleszkoch, and Raphael C Pooser. Unbiased simulation of near-clifford quantum circuits. *Physical Review A*, 95(6):062337, 2017.
- [2] Robert A Bridges, John Collins, **Ferragut, Erik M**, Jason Laska, and Blair D Sullivan. A multi-level anomaly detection algorithm for time-varying graph data with interactive visualization. *Social Network Analysis and Mining*, 6(1):99, 2016.
- [3] Rama K Vasudevan, Nouamane Laanait, **Ferragut, Erik M**, Kai Wang, David B Geohegan, Kai Xiao, Maxim Ziatdinov, Stephen Jesse, Ondrej Dyck, and Sergei V Kalinin. Mapping mesoscopic phase evolution during e-beam induced transformations via deep learning of atomically resolved images. *npj Computational Materials*, 4(1):1–9, 2018.

### Refereed Conference Papers

- [1] **Ferragut, Erik M**, Andrew C Brady, Ethan J Brady, Jacob M Ferragut, Nathan M Ferragut, and Max C Wildgruber. Hackattack: Game-theoretic analysis of realistic cyber conflicts. In *Proceedings of the 11th Annual Cyber and Information Security Research Conference*. ACM, 2016. **Best Paper Award**.

## Patents

- [1] **Ferragut, Erik M** and Jason A Laska. Cyber physical attack detection, publication date February 23 2021. US Patent 10,929,529.
- [2] **Ferragut, Erik M**, John R Goodall, Michael D Iannacone, Jason A Laska, and Lane T Harrison. Real-time detection and classification of anomalous events in streaming data, April 19 2016. US Patent 9,319,421.
- [3] **Ferragut, Erik M**, Jason A Laska, and Robert A Bridges. Detection of anomalous events, June 7 2016. US Patent 9,361,463.
- [4] Robert K Abercrombie, Frederick T Sheldon, and **Ferragut, Erik M.** Cyberspace security system, September 13 2012. US Patent 8,762,188.

## Classified Papers

Authored 16 peer-reviewed classified papers in cryptology and related fields (1994–2005, 2007–2009). Received two Crypto-Mathematics Institute and one KRYPTOS competitive paper awards.

## Education

December 2003	Ph.D. in Mathematics University of Michigan, Ann Arbor Dissertation: “ <i>Detection of Epistatic Effects in Genetic Data</i> ” Advisor: Phil Hanlon
August 1999	M.S. in Mathematics University of Michigan, Ann Arbor
May 1997	B.S. in Mathematics, <i>Summa Cum Laude</i> Highest honors in Mathematics, Physics, and Philosophy Ursinus College, Collegeville, PA

## Project Leadership and Funds Captured

PI, Cyber Physical Attack Detection (2017–2020)  
Department of Homeland Security, Science and Technology  
Point of Contact: Nadia Carlsten, Ph.D., Program Manager  
Transition to Practice (TTP) program  
Cyber Security Division (CSD)  
Homeland Security Advanced Research Projects Agency

Task Lead, Anomaly Detection in Cyber Data (2014–2016)  
Navy Cyber Defense Operations Command

Point of Contact: Rob Stappert  
Network Forensics Technical Advisor  
Navy Cyber Defense Operations Command

PI, Situation Awareness in Complex Networks (2013–2015)  
Laboratory Directed Research and Development  
Oak Ridge National Laboratory

Task Lead, Automated Data Quality Assessment (2013–2014)  
Affordable Care Act Data Solutions project  
Center for Medicare and Medicaid Services (CMS)

PI/Mentor, Deception Detection (2011-2012)  
Intelligence Community Post-Doctoral Research Program

PI, Cyber Security Development and Training (2010-2011)  
Johnson C. Smith University (HBCU)

## Research Experience

12/2017 – Present

*Director of Data Scientist  
Optum (UnitedHealth Group)  
Telecommute to Eden Prairie, MN*

Principal data scientist responsible for development, testing, and monitoring of unsupervised, semi-supervised, and supervised data-driven models for detection of fraud, waste, abuse, and error within claim data for an important client. Provide technical leadership to other data scientists within the group.

6/2009 – 11/2017

*Cyber Security Research Scientist  
Oak Ridge National Laboratory  
Oak Ridge, Tennessee*

Research scientist and principal investigator for cyber security, anomaly and intrusion detection, situation awareness, probabilistic modeling, and machine learning. Key contributor to research in visual analytics, adversarial control theory, critical infrastructure protection, quantum computing, compressive sensing, and formal methods.

8/2007 – 6/2009

*Applied Research Mathematician  
Institute for Defense Analyses  
Princeton, New Jersey*

Applied multiple areas of mathematics (group theory, representation theory, coding theory, combinatorial commutative algebra, probability theory, combinatorics, and topology) to research problems in national security.

8/2006 – 8/2007

*Cyber Security Research Scientist  
Oak Ridge National Laboratory  
Oak Ridge, Tennessee*

Research staff contributing to distributed anomaly detection algorithms for cyber security. Supported projects in weigh-in-motion and communications.

10/2005 – 8/2006

*Applied Research Mathematician  
Johns Hopkins University, Applied Physics Laboratory  
Laurel, Maryland*

Improved methods for systematizing and validating large-scale risk assessments. Co-discovered and reported a cyber vulnerability on a high-value system together with an effective exploit.

8/1993 – 10/2005

*Applied Research Mathematician  
National Security Agency  
Fort George G. Meade, Maryland*

Participant of Stokes Fellowship Co-operative program (1993–1997), Director's Summer Program (1995), and Applied Mathematics Program (1997–2002). Research staff member in Cryptographic Research. Applied multiple areas of mathematics (group theory, representation theory, combinatorial commutative algebra, probability theory, combinatorics, and topology) to research problems for national security.

9/1997 – 12/1999

*Graduate Research Assistant  
University of Michigan  
Ann Arbor, Michigan*

Instructor for two sessions of pre-calculus.

## Mentoring

- Benjamin C. Dutton, North Carolina State University, Raleigh, NC, Summer 2017.
- Emily Lindsey Grinstead, University of South Alabama, Mobile, AL, Summer 2017.
- Andrew C. Brady, Jefferson Middle School, Oak Ridge, TN, Summer 2015.
- Ethan J. Brady, Oak Ridge High School, Oak Ridge, TN, Summer 2015.
- Jacob M. Ferragut, Oak Ridge High School, Oak Ridge, TN Summer 2015.
- Nathan M. Ferragut, Oak Ridge High School, Oak Ridge, TN Summer 2015.
- Max C. Wildgruber, Oak Ridge High School, Oak Ridge, TN, Summer 2015.
- George E. Gallarno, Christian Brothers University, Memphis, Undergraduate Student Researcher, Summer 2014.
- Timothy D. Goodrich, North Carolina State University, Raleigh, Graduate Student Researcher, Summer 2014.
- Ronald D. Hagan, University of Tennessee, Knoxville (UTK) Graduate Student Researcher, Summer 2014.
- Samantha N. Petti, Williams College, Science Undergraduate Laboratory Internships (SULI), Summer 2014.
- Jessica L. Robins, University of Tennessee, Knoxville (UTK) Science Undergraduate Laboratory Internships (SULI), Summer 2014.
- John P. Collins, Post-Masters Researcher, 2013–2014.
- Robert Bridges, Post-Doctoral Researcher, 2012–2013.

- 
- Riley Spahn, Post-Baccalaureate Researcher, Fall 2012 to Spring 2013, and Auburn University Undergraduate Student, Summer 2011
  - Jason Laska, Intelligence Community Post-Doctoral Researcher, 2011–2012.
  - E. Nicole Braden, University of the Cumberland Undergraduate Student, Summer 2011.
  - Scott Mancuso, Brigham Young University Undergraduate Student, Summer 2011.
  - Stephen Kelley, Intelligence Community Post-Doctoral Researcher, Summer 2010 to Spring 2012.
  - Alicia Marino, Quinnipiac University Undergraduate Student, Spring 2011.
  - David Darmon, Ursinus College Undergraduate Student, Summer 2010.
  - Anita Zakrzewska, Brandeis University Undergraduate Student, Summer 2010.
  - Aimee Cothran, High School Mathematics Teacher in the Greater Memphis Area, Summer 2010.

## Other Information

- Fluent in English and Spanish
- Programming preferences: Python, C/C++, Matlab/Octave, Sage
- Preferred machine learning tools: Python, PySpark, SQL, Pandas, scikit-learn, TensorFlow, Keras, numpy, scipy
- Citizenship: USA
